

SpeedSentry SB

Overview

SpeedSentry™ signs monitor the speed of approaching traffic and display that speed on 270mm high visibility digits. Integrated or stand-alone video camera units allow for the identification of vehicles that are exceeding the posted speed limits.

Speed Management solution

Most estates are an extremely safe environment and have many pedestrians, young children and pets on the streets. Speed limits are set low to take this into account, but these limits are often ignored and estates do not necessarily have the manpower to aggressively prosecute offenders.

Camera System

SpeedSentry SB camera units can be integrated into the SpeedSentry shell or used as a stand-alone:

- Takes video clips of vehicles exceeding the programmed speed;
- Overlays the video footage with the speed, date and unit reference;
- Video clips are stored on the system until downloaded;
- Video clips can be emailed automatically if an Internet (wireless / Ethernet) connection is available; in Residential Estates?
- Stores advanced traffic monitoring data as well.

Why are speed limits important in Residential Estates?

Technical specifications

	With Day/Night Camera
Size mm (h x w x d)	200 x 200 x 110
Display Size	N/A
Power Supply	220V AC / Solar / Battery
Pickup Distance	90 meters
Infrared Lamp	Yes
Camera Angle	45 Degrees
Beam Angle	38 x 45 Degrees
CE and FAA Approval	Yes
Brightness	N/A
